ACFoam® Supreme Specifications

Division 07 Thermal and Moisture Protection
Section 07 22 00 - Roof and Deck Insulation
Section 07 22 16 - Roof Board Insulation

PART 1 GENERAL
1.1 SECTION INCLUDES
A. HCFC FREE Polyiso Rigid board type roof insulation(s) for thermal protection as part of roofing assemblies.
B. Recover board Polyiso roof insulation.
C. Roofing crickets.

1.2 RELATED SECTIONS
A. Section 05 30 00 - Metal Decking.
B. Section 06 10 00 - Rough Carpentry: Roof blocking and nailers.

1.3 REFERENCES
Specifier Note: (finish article heading number in sequential order)
E. FM 4450 - Approval Standard - Class I Insulated Steel Roof Decks.
F. FM 4470 - Approval Standard - Class I Roof Covers.
G. FS HH-I-1972/1 - Insulation Board, Thermal, Polyurethane or Polyisocyanurate, Faced with Aluminum Foil on Both Sides of the Foam.
H. FS HH-I-1972/2 - Insulation Board, Thermal, Polyurethane or Polyisocyanurate, Faced with Asphalt/Organic Felt, Asphalt/Asbestos Felt, or Asphalt/Glass Fiber Felt on Both Sides of the Foam.
I. FS HH-I-1972/3 - Insulation Board, Thermal, Polyurethane or Polyisocyanurate, Faced with Perlite Insulation Board on One Side and Asphalt/Organic Felt or Asphalt/Glass Fiber Felt on the Other.

Specifiers Note: The above mentioned FS references are no longer applicable but may still be in some house master specs – it is recommended to remove these
J. LTTR – Long Term Thermal Resistance predicted by CAN/ULC-S770-03.
M. UL 1256 - Fire Test of Roof Deck Constructions.
N. ASTM E 2114-01 – Standard Terminology for Sustainability Relative to the Performance of Buildings
O. ASTME 2129 -01 – Standard Practice for Data Collection for Sustainability Assessment of Building Products.

1.4 DEFINITIONS
Specifier Note: Define unusual terms not explained in the Contract Documents but are used in unique ways not included in standard references. This article is rarely used BUT this is a new term as of 2003.

A. LTTR (Long Term Thermal Resistance) is defined as using techniques from ASTM C1303 or CAN/ULC-S770, the predicted R-Value that has been shown to be equivalent to the average performance of a permeably faced foam insulation product over 15 years. LTTR applies to ALL foam insulation products with blowing agents other than air, such as polyiso, extruded polystyrene and polyurethane. The new method is based on consensus standards in the US and Canada.

1.5 SUBMITTALS
A. Submit under provisions of Section 01 30 00 and 01 60 00.
B. Product Data:
   1. Manufacturer’s specifications.
   2. Installation instructions for insulation board and fasteners.
   3. Product Data as per ASTM 2129 – 01 Standard for Data Collection for Sustainability Assessment of Building Products.
C. Samples:
   1. Submit 6 by 6 inch (152 by 152 mm) samples of each board type required.
   2. Submit samples of each fastener type required.
D. Shop Drawings: Roof plan showing layout of boards and fastening patterns.
E. Certificates: System Manufacturer’s or insulation manufacturer’s certification that the insulation meets Zero ODP (Ozone Depletion Potential) and Zero GWP (Global Warming Potential) specification requirements.
F. Thermal Warranty: Submit sample warranty indicating conditions and limitations.

1.6 QUALITY ASSURANCE
A. Regulatory Requirements:
*** VERIFY WITH APPLICABLE GOVERNING AGENCIES THE SPECIFIC STANDARDS TO BE COMPLIED WITH AND RETAIN, DELETE OR ADD ADDITIONAL REQUIREMENTS BELOW. ***
   2. Federal Specifications (FS).

Specifiers Note: The FS references are no longer applicable but may still be in some house master specs – it is recommended to remove these
   3. Factory Mutual (FM).
   4. Underwriters Laboratories Inc. (UL) Classification.
   5. Metro-Dade County, Florida Product Control.
   7. IBC, BOCA, ICBO and SBCCI Sections on Foam Plastic Insulation.
   8. Canadian Compliance: CAN/ULC.

1.7 DELIVERY, STORAGE AND HANDLING
A. Comply with general requirements specified in Section 01 65 00.
B. Deliver insulation in packages labeled with material name, thermal value and product code.
C. When stored outdoors, stack insulation on pallets above ground or roof deck and cover with tarpaulin or other suitable waterproof coverings. Slit or remove manufacturer’s packaging before covering with waterproof covering.

1.8 PROJECT CONDITIONS
ACFoam Supreme Specifications
Atlas Roofing

A. Comply with insurance underwriter’s requirements applicable for products of this Section.
B. Do not install insulation on roof deck when water of any type is present. Do not apply roofing materials when substrate is damp or wet.

PART 2 PRODUCTS
2.1 MANUFACTURERS
A. Acceptable Manufacturers: Atlas Roofing Corporation, ____________
   Atlas Roofing Corporation,
   2000 RiverEdge Pkwy, Suite 800, Atlanta, GA 30328.
   Ph. (770) 952-1442
   Fax (770) 952-3170
B. Local Representative(s): Atlas Roofing Corporation __________________________, ____________________________.

*** INSERT NAME, ADDRESS AND PHONE NUMBER. ***
C. Substitutions: Not permitted.
D. Provide polyiso roof board insulation from a single manufacturer.

2.2 MATERIALS
A. Polyiso Roof Board Insulation: Provide products that comply with the following:
   1. ASTM standards specified.
   2. Factory Mutual (FM) approvals specified.
   3. Underwriters Laboratories Inc. (UL) classifications specified.
   6. BOCA National Building Code Section on Foam Plastic Insulation
   9. Canadian Compliance: CAN/ULC and CCMC.
B. ACFoam Supreme: Closed-cell HCFC FREE “Green” polyisocyanurate foam core manufactured using [HCFC] [ACUltra Hydrocarbon] blowing agent with trilaminate foil facers; FM [1-60] [1-90] wind uplift classification; compressive strength - [20 psi] [25 psi].

Federal Specification HH-I-1972/GEN and HH-I-1972/1, Class 1 (with tri-laminate foil facers) have been cancelled
   ASTM C 1289, Type I, Class I
   Miami-Dade County, Florida Product Control No. 00-0208.04
   State of California, License #TC 1231
   IBC, NBC, UBC and SBC Sections on Foam Insulation (Chapter 26)
   CCMC No. 12422-R
   CAN/CGSB-51.26-M86
   CAN/ULC-S704

FM Standard 4450/4470 Approval
ACFoam Supreme is approved for Class 1 insulated steel roof deck construction. Refer to FM Approval Guide for details.

UL Standard 790 (ASTM E 108) Classification
Class A with certain roof membrane systems.

*** INSERT REQUIRED "R" VALUE BELOW. ***

C. LTTR - Insulation "R" Value:* Long-term thermal resistance values of the foam were determined in accordance with CAN/ULC-S770. All test samples were third-party selected and tested by an accredited materials testing laboratory.

D. Related Materials:
   1. Fasteners: Factory Mutual approved.
   2. Base Ply: As recommended by membrane manufacturer.
   4. Asphalt Bitumen: Comply with ASTM D 312, Type III (steep) or Type IV. USE ONLY ON APPROVED BOARD INSULATION TYPES.
      a. Provide with labels indicating flash point, softening point, finished blowing temperature, and equiviscous temperature.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine roof deck for suitability to receive insulation. Verify that substrate is dry, clean and free of foreign material that will damage insulation or impede installation.

B. Verify that roof drains, scuppers, roof curbs, nailers, equipment supports, vents and other roof accessories are secured properly and installed in conformance with Contract Drawings and submittals.

C. Verify that deck is structurally sound to support installers, materials and equipment without damaging or deforming work.
   1. Start of installation indicates installer accepts conditions of existing deck surfaces.

3.2 APPLICATION / INSTALLATION

*** VERIFY NEED FOR A VAPOR RETARDER WITH DESIGNER IN ACCORDANCE WITH CURRENT VAPOR RETARDER THEORY AND ENGINEERING FORMULAS. WHEN REQUIRED, INSERT INSTALLATION REQUIREMENTS OF VAPOR RETARDER MANUFACTURER. ***

Specifiers Note: Atlas strongly recommends the use of a vapor retarder with a perm rating of 0.5 or less (i.e., 4 mil polyethylene minimum) on all projects except those in extreme cooling climates.

A. Install specified insulation using approved [mechanical fasteners] [hot asphalt] [adhesives] in accordance with manufacturer’s latest written instructions and as required by governing codes and Owner’s insurance carrier.

B. Install with end joints staggered to avoid having insulation joints coinciding with joints in deck. In multi-layer installations, stagger joints in top and bottom layers.

*** NOTE TO SPECIFIER: ATLAS SUPPORTS NRCA AND OTHER INDUSTRY AUTHORITIES IN RECOMMENDING MULTI-LAYER INSULATION APPLICATIONS. (SEE TECHNICAL BULLETIN #00-01) ***

3.3 CLEANING / PROTECTION

A. Remove trash and construction debris from insulation surface prior to application of roofing membrane.

B. Do not leave installed insulation exposed to weather. Cover and waterproof with completed roof system immediately after installation.
   1. Temporarily seal exposed insulation edges at the end of each day.
   2. Remove and replace installed insulation that has become wet or damaged with new
insulation.

C. Protect installed insulation and roof cover from traffic by use of protective covering materials during and after installation.
